To whom it may concern

I manage the Body Corporate for Airport Storage (47 Sheds) and Wharewaka Storage (42 Sheds).

These properties have automatic sliding gates installed by the developer. We have contracted Allan Hill to maintain the gates.

We have found his service of a very high standard. Allan is always willing to come and sort out any issues even on weekends and after hours.

His knowledge of the systems is very good and any repairs required are carried out quickly and efficiently.

The gates have a high usage with the Wharewaka Storage gates having over 11,000 operation in 3 years. So its important to keep them operating well which Allan does.

I would recommend Allan for this type of installation

Please contact me if you require an further information.

Yours faithfully
